PENN METAL CO. OF PENNA.

OREGON AVE. & SWANSON ST.

PHILADELPHIA, PA.

Why Penco Ceilings are so widely used

THEY are durable—low in cost—easy to decorate—most sanitary. Plaster ceilings on wood lath even of the best type eventually warp—crack and fall down—They quickly discolor and offer refuge to rats and other vermin. Penco ceiling cannot chip—crack or fall.

A Penco Ceiling cost less than a plaster ceiling because it results in utmost durability and can be kept neat and clean at but a nominal expense.

Repairing old Plaster ceilings

Instead of trying to patch an old plaster ceiling—put a Penco Ceiling right over it—nailing $\frac{7}{8}$ inch wood furring over the plaster into the timbers above and nailing the Penco ceiling to the furring.

How to Order

State character of work—as church, Hall, Store, etc., and send outline sketch showing all dimensions.

Note nature of surfaces, whether plaster, joist, sheathing, terra cotta, etc.

Select the patterns desired, giving unit numbers of field, border, cornice, etc., or give the combination number, if the entire design is wanted, as shown.

All prices made are f.o.b. cars Philadelphia

We are prepared to quote on stock or special designs, or on work installed complete, ready for final painting.

Directions for Applying Penco Metal Ceilings

Any carpenter or sheet metal worker can put up Penco Ceiling from our working drawings. Where desired, we furnish mechanics at regular rates and expenses.

If surfaces are plaster or joist use $\frac{7}{8}$ " x $1\frac{1}{2}$ " or 2" furring strips, placed as shown on working drawing taking care to level the furring.

Place filler first, then cornice and field plates.

Stamped mitres are furnished at extra cost with certain cornices but all cornices are easily mitered on the job.

To cut a mitre on cornice or mould, cut stock like a wood cornice of same section, only $\frac{1}{4}$ inch longer than needed then snip this $\frac{1}{4}$ inch lap every $\frac{1}{4}$ inch, all the way up the lap, so as to bend same in or out, at right angles, to turn over the other member on an outside mitre, or to butt up against the other member on an inside mitre then tamp down carefully.

All metal is primed one coat on each side before shipment, with light colored paint.

Count your stock upon arrival and see that it corresponds with the drawing, then follow the working drawing carefully.

Terms

Thirty days net cash to concerns with commercial rating or furnishing references.

Two per cent cash discount from net amount of bill on payments made within ten days from date of shipment. No discount allowed after ten days.

Claims

Claims for errors should be made upon receipt of goods. Check your shipment carefully upon arrival—have shortage or damage noted by freight agent upon your Bill of Lading and report same to us immediately.

How to Measure a Ceiling

Showing method of showing dimensions

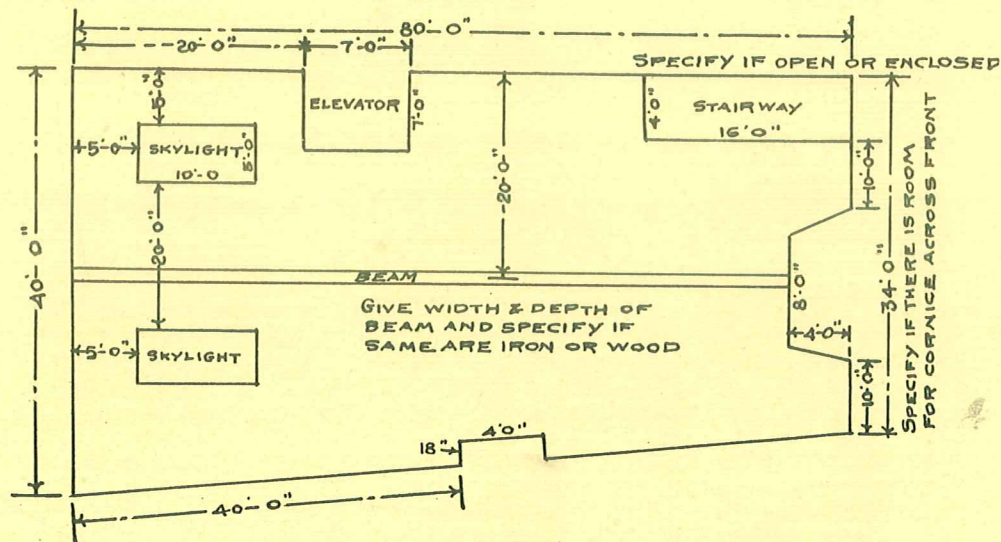

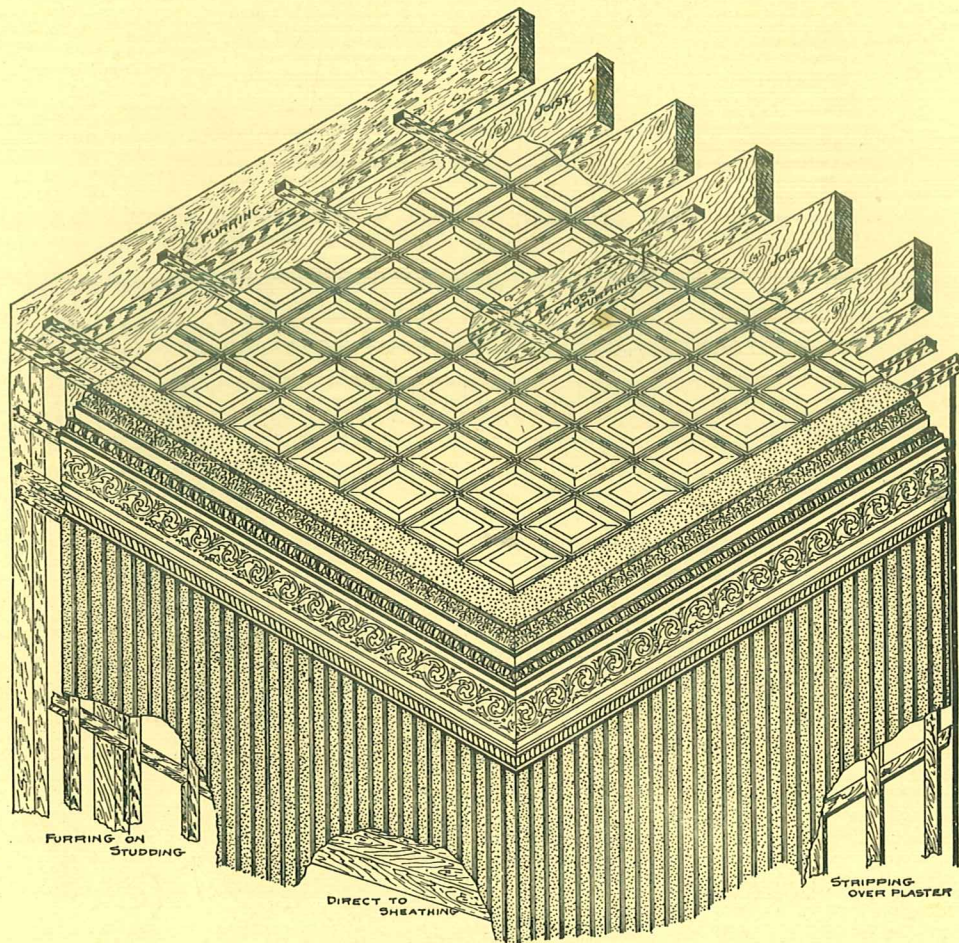

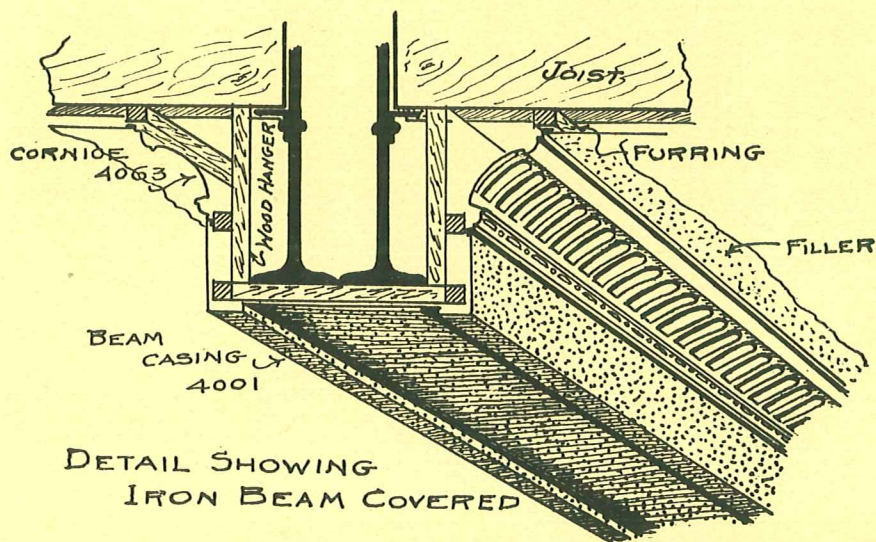

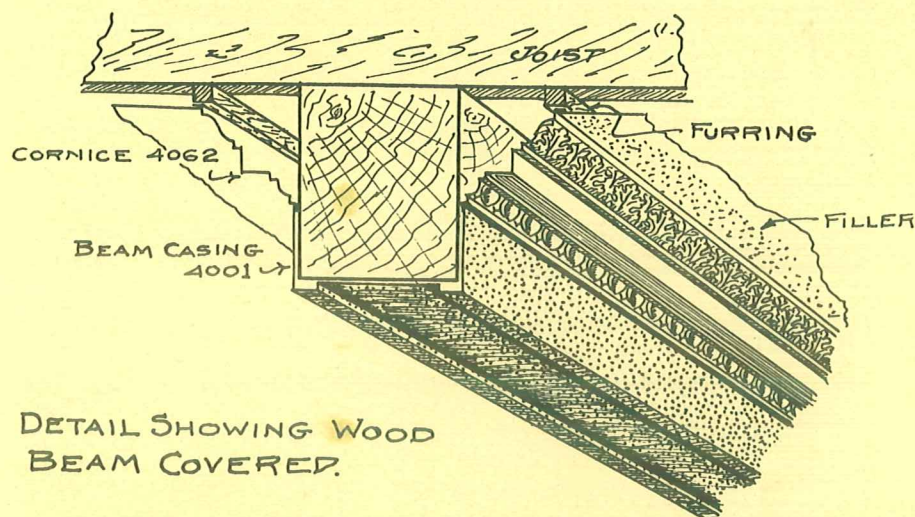

DIAGRAM SHOWING MEASUREMENTS
 FOR STORE ROOM

When sending in sketches, for prices or in ordering, follow closely the outline given here. Indicate on your sketch, spaces, if any, not to be covered.

Why are
PENCO
Metal Ceilings
superior
to plastered
ceilings?

1. One fourth of the weight.
2. Sanitary.
3. Easily erected.
4. Can be applied over old plaster.
5. No dirt, no muss.
6. Will not crack or fall.
7. Easily decorated.
8. Prevent the spread of fire.
9. Easily washed and cleaned.
10. Decoration can be changed at anytime.
11. Permanent.
12. Pleasing in appearance.
13. 500 different combinations of designs.
14. Thousands of satisfied customers all over the country.
15. Pioneers in the metal ceiling industry.
16. Expert workmanship and materials.

NEAR PANIC AS CEILING FALLS AT MEDFORD HIGH PROM

Fear Injured Boy Has a Fractured Skull; Boys Prevent a Panic in Armory

A large piece of ceiling, falling on dancers at the Medford high school junior prom last night at the armory, sent one youth to the hospital with serious head injuries and caused a near panic, it was revealed today.

The injured boy is Allen Coleman Griffin, high school pupil and radio singer. He has a severe gash in his head and a possible fracture of the skull.

FIRE AT 9TH AND RACE

Traffic Delayed When Blaze Damages Floors Above Restaurant

A 4-story brick building at 204 N. 9th st., was damaged by fire shortly after 9 A. M. today.

The blaze started above the ceiling of a restaurant on the first and spread through partitions to the upper floors. The restaurant, due to a metal ceiling, was not damaged.

Traffic on 9th st. was tied up half an hour, being rerouted over Race st. Harry Kaplan, owner of the restaurant, used the upper floors for storage but his loss was slight.
